SUMMARY

Java/Kotlin developer with three years of experience building and maintaining applications using Spring Boot, Hibernate, and related technologies. I have improved application performance and reduced errors, and I've helped make development processes more efficient. I share my knowledge through mentoring, technical interviews, writing about Java, Spring, and Postgres on Medium, and by creating a free Prolog programming course. I'm looking for a challenging Java Engineer role where I can use my skills to work on important projects.

PROFESSIONAL EXPERIENCE

YLAB

Middle Java/Kotlin Developer   AUG 2023 - Present
- Optimized the image generation process, resulting in a 5x reduction in RAM usage, leading to improved application stability and reduced server costs
- Implemented image compression using ImageIO, preserving original resolution and shrinking the S3 bucket size by 30%, leading to reduced storage costs
- Replaced Jasper Reports with Apache POI for Excel report generation, resulting in a 10% increase in report generation speed
- Introduced Camunda BPMN scheme testing, reducing runtime bugs by 20%
- Developed Kotlin-based testing utilities with a user-friendly DSL for Camunda, increasing test writing speed by 15% and boosting team's Velocity by 5%
- Achieved 100% test coverage for two large BPMN schemes, comprising over 700 elements and 1100 flows
- Performed code reviews for over 100 interns in an internal Java course
- Performed 7 technical interviews for internal grade ratings and more than 10 mock interviews

YLAB

Junior Java/Kotlin Developer   MAY 2023 - Aug 2023
- Covered 7 BPMN processes for Camunda with integration tests, resulting in improved stability
- Achieved test coverage of 97% for 15 Spring microservices using unit tests and integration tests

YLAB

Junior Java/Kotlin Developer   OCT 2022 - May 2023
- Designed and developed a BPMN migration tool, similar to Liquibase, that accelerated development by 10%
- Created a REST connector for Camunda 8 for distributed logging and reduced error investigation time by 10%
- Created a job worker for Camunda 8 to enable uploading and downloading files from S3 within BPMN tasks
- Redesigned the search functionality over Elasticsearch to support displaying over 10,000 documents

EDUCATION

KUBAN STATE UNIVERSITY   **Krasnodar, Russia**
Master of Informatics And Applied Mathematics   **2022-2024**
Studied computer science, including algorithms, Java, relational databases, mathematical analysis, and discrete mathematics. Participated in several conferences and authored papers on cryptography and bioinformatics.

TECHNICAL SKILLS

- Programming languages: Java, Kotlin
- Frameworks: Spring, Spring Boot, Hibernate, JOOQ, Camunda, gRPC
- Databases and platforms: Postgres, Apache Kafka, Elasticsearch, Redis
- Tools: Docker, CI/CD, Apache Avro
- System design: Microservices, REST API, Gateway, Reactive
- Languages: Russian (native), English (B2)
